### Professional Experience

**Plateau GRP, FairFax, VA(Remote)**

November 2022 – Current

#### **Full Stack .NET Developer**

- Developed and maintained multiple web applications for high-profile clients using Angular, .NET Core, and SQL, resulting in increased user engagement and satisfaction.
- Collaborated with cross-functional teams, including product management, design, and QA, to deliver software solutions that met or exceeded client expectations.
- Implemented RESTful APIs using .NET Core, ensuring seamless communication between front-end and back-end components.
- Optimized database performance by designing and implementing efficient SQL queries, stored procedures, and triggers.
- Utilized modern web development best practices, such as responsive design and progressive enhancement, to create user-friendly and accessible web applications.
- Actively participated in code reviews, unit testing, and performance testing to ensure code quality, maintainability, and scalability.

**Advanced Airfoil Components, Gibsonton, FL**

June 2022 – November 2022

#### **Full Stack Software Developer**

- Assisted senior developers in the design and development of web applications using Angular, .NET Core, and SQL, gaining hands-on experience in both front-end and back-end development.
- Participated in daily stand-up meetings and sprint reviews, contributing to a collaborative and agile development environment.
- Developed and maintained technical documentation to facilitate knowledge transfer among team members and support ongoing maintenance efforts.
- Conducted unit testing and integration testing to validate the functionality and performance of newly developed features.

**B-EZ Graphix, Tallahassee, FL**

February 2022 – June 2022

#### **Full Stack Software Developer**

- Collaborated with an Agile team of .NET/Angular developers in a fast-paced software development firm, delivering high-quality applications.
- Managed tasks and sprints efficiently using Azure DevOps Boards for seamless project tracking.
- Enhanced page and data loading speeds through C# memory caching implementation.
- Streamlined API functionality by creating and implementing stored procedures with Microsoft SQL Server.
- Integrated frontend with deserialized JSON data for seamless data display and user experience.
- Leveraged Azure for website hosting and efficient multi-server development environments.
- Improved web page aesthetics and functionality by creating and modifying CSS and HTML files.

### Education

Tallahassee Community College, Tallahassee, FL
